
Senior Manager – Intellectual Property

IRICoR (Institute for Research in Immunology and Cancer - Commercialization of Research)

Description of the mandate

The person holding this position will, under the main guidelines adopted with the Vice-President – Scientific Operations, develop intellectual property (IP) strategies adapted to each portfolio project. Through his/her strategic role, he/she will be called upon to provide advice and guidance to IRICoR's senior management with respect to its new investment projects. Because of the great scope of his/her role, he/she will issue recommendations and act as an intellectual property (IP) consultant and resource person for a multitude of stakeholders..

Main challenges

- Developing and adapting IP strategies for major projects managed by IRICoR, according to complex patentability and commercialization parameters;
- Issuing, through complex intellectual property analyses, strategic investment recommendations, according to multiple regulatory, scientific, technical and commercial legal aspects;
- Coordinating and assisting in the drafting of patent applications in collaboration with investigators and patent agents from outside firms;
- Preparing and managing budgets with respect to the unfolding of IP activities for each portfolio project;
- Being responsible for achieving the goals of very complex IRICoR projects with respect to IP;
- Being responsible for ensuring that agreement conditions with the partners are respected with respect to IP by being vigilant about the terms and conditions negotiated;
- Supervising the work of an IP analyst (R2 level) and being responsible for the quality and relevance of his/her work;
- Acting as a resource person and consultant for a multitude of stakeholders, notably external consultants, investigators, senior management, project teams, etc.

Profile sought

- Master's degree in Life Sciences or in an appropriate specialty field and three (3) years of experience in the research field or Ph.D. in an appropriate specialty field;
- Experience as part of an IP firm, a public research commercialization department, university or research organization, or in the IP department of a company is considered to be a major asset;
- Knowledge in the fields of intellectual property, market study and analysis;
- Ability to work as part of a team while also being autonomous;
- Great ability to analyze, summarize and communicate, particularly in the business field, in order to effortlessly interact with scientists, patent agents and other professionals;
- Great ability to manage several concurrent timetables;
- Excellent command of French and English, both spoken and written.
