

From today's research to
tomorrow's therapies

CENTRE OF EXCELLENCE IN COMMERCIALIZATION AND RESEARCH

IRICoR bridges the gap between academic research and the biopharmaceutical sector in order to accelerate the transformation of drug discovery projects into new therapies, for the benefit of patients.

- Support the development of new therapies against cancer and rare disease
- Captures and maximizes the value of innovative intellectual property
- Generates investment opportunities for foreign capital
- Stimulates the growth of entrepreneurial activities in life sciences in Canada

PARTNER FOR INNOVATION

IRICoR provides the link between stakeholders, increases access to resources and ensures support at every level.

CUSTOMIZED STRATEGIC SUPPORT

MATURATION

Support throughout the development process

IDENTIFICATION OF PROJECTS

Selection of scientifically and commercially promising projects

CORE FACILITIES

Privileged access to relevant expertise and infrastructures, including IRIC's Drug Discovery Unit

COMMERCIALIZATION

Establishment of co-development partnerships, structuring of companies and marketing of therapeutic solutions

HIGH-IMPACT ACHIEVEMENTS

Pan-Canadian activities leading to international recognition.

- More than **100** project financings
- Over **60** projects with public and private partners
